## SUMMARY

Seeking a software developer position to utilize my knowledge and contribute to the development of high- quality software solutions. Passionate about learning and growing within a collaborative team environment.

## Technologies

**Languages:** Java, HTML , CSS , SQL, JavaScript,REACT

**Tools:** VS Code, MySQL, Excel, Overleaf.

## Education

| | | |
|---|---|---|
| **UG** | **PAAVAI ENGINEERING COLLEGE**, Electrical and Electronics Engineering | NOV 2022 – May 2026 |

- CGPA: 7.03/10

## Projects

**QUESTION BANK**, FULL-STACK WEBSITE

- **Secure Student Contribution:** A web application built with React and MySQL that allows university students to upload questions to a centralized database securely using password-based authentication.
- **A Platform for Collaborative Learning:** The user-friendly React frontend facilitates easy question submission, fostering a shared resource for enhanced student learning and knowledge exchange.
- **Demonstrates Full-Stack Skills:** Showcases proficiency in modern front-end development (React) and robust back-end database management (MySQL), highlighting the ability to build a secure and functional web application.

**ROOM LOCATOR**, FULL-STACK WEBSITE (ONGOING)

- Developed a web application using React for a dynamic frontend and MySQL for data storage, enabling users to search for available Paying Guest accommodations by specifying their desired location.
- Features a user-friendly interface allowing individuals to input their preferred location, which is then used to query the MySQL database for relevant PG listings in that area.
- Demonstrates the effective integration of a modern JavaScript framework (React) for an interactive user experience with a robust relational database (MySQL) for managing and retrieving PG location data.

### PRACTICE Projects

- NETFLIX-CLONE
- WEATHER APP
- TO-DO LIST

### AREA OF INTEREST

- CODING
- Learning new tech stack
